

# Reinvent the future of work with Copilot for Microsoft 365

# The AI-powered future of work

**Computacenter helps minimise the complexity of mundane tasks, enabling people and organisations to achieve their productivity goals with greater speed and accuracy.**

Copilot for Microsoft 365 is reinventing the workplace, streamlining processes, and empowering organisations. Copilot can transform how people work, improving their ability to collaborate and create content at speed.

The adoption of innovative and cutting-edge features places businesses at the forefront of innovation, fostering resilience and success in a rapidly-evolving technological landscape.

Our workplace solutions leverage AI and empowers people to improve workflows, generate content, and analyse data seamlessly. Workplace automation enables users to simplify complex tasks, allowing employees to be more productive and focus on what really matters.

Copilot for Microsoft 365 transforms how you work with your Microsoft apps, giving you an innovative approach to your workplace interactions.

# Transform the way you work

Copilot for Microsoft 365 reinvents how you engage with your Microsoft productivity apps, offering an innovative approach to your workplace interactions.

## Get ready for AI

Discover and refine your customer employee groups and workflows to exploit Microsoft Copilot.

Prepare your data and security platforms to get the best from Microsoft Copilot and ensure they have the right security permissions to protect company data.

## Manage AI change

Conduct small scale proof of concept and proof of value exercises to validate the technology and value you expect with your initial user groups.

Get help setting up a centre of excellence for Microsoft Copilot to ensure you have the right controls and guardrails in place to support early adoption of the technology.

## Expand and explore AI

Deployment of Microsoft Copilot to larger user communities, combined with a programme of user enablement and adoption activities to ensure you get the value from Microsoft Copilot.

Continue nurturing the maturity of your center of excellence to gain optimal value.

# Release your potential

**Imagine a time where you could have a digital assistant who could help you summarise that email or create a first draft of a presentation, bringing your data to life.**

A time that allows you to remain productive and keep focus on more innovative work tasks. Now this can be achieved with Copilot for Microsoft 365.

At Computacenter, we continue to put people at the heart of any technology innovation. We believe Generative AI and Copilot for Microsoft 365 can be part of the future of work, where your people will be able to unleash their full potential and transform their ways of working.
